

BOSâNOVAMobile

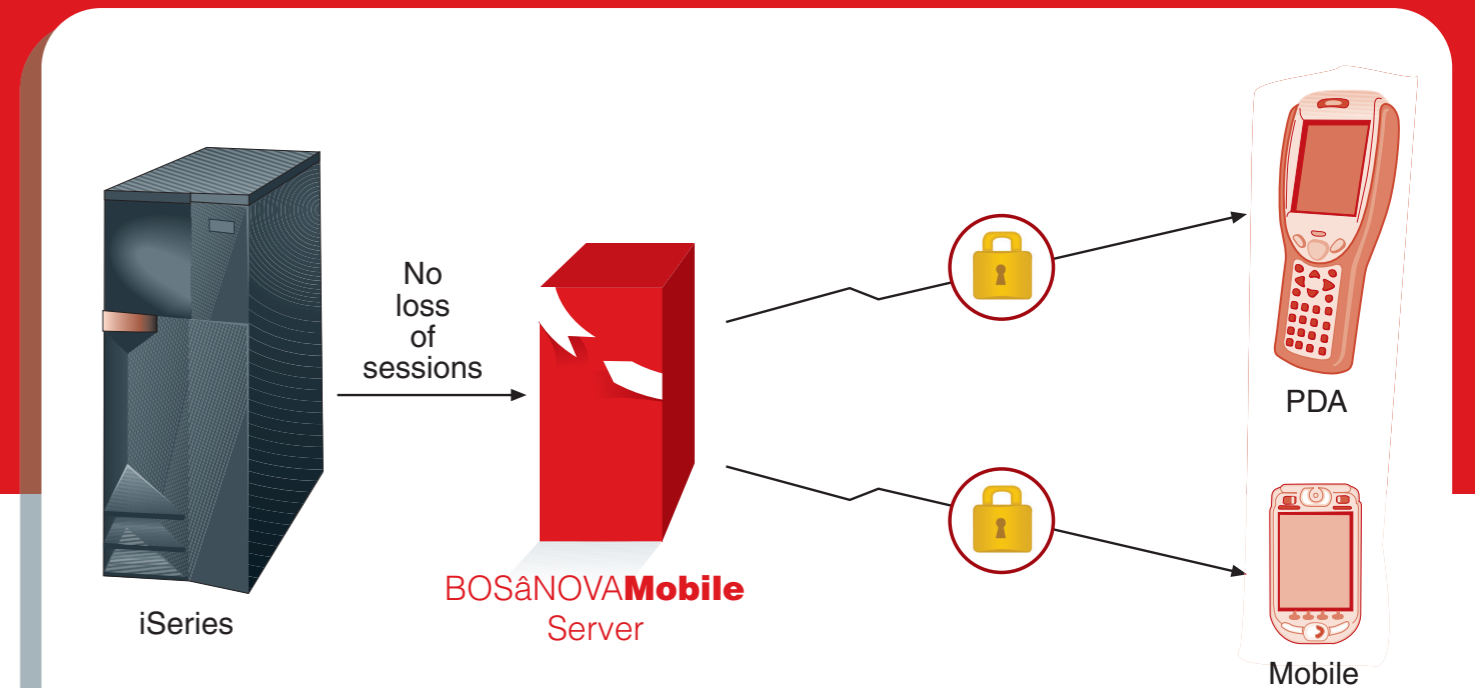

FOR A WORLD ON-THE-GO
Transform your mobile into a workstation

Your Next Connection

The world is going mobile.

Are you empowering your employees and reps to keep up?

Field agents, sales personnel, system administrators and other employees are increasingly on the go. But the applications and data in your corporate computers aren't keeping up with them. Today's staff need to be able to access and interact with corporate IT resources from cellphones, PDAs and wireless terminals.

BOSâNOVA Mobile *is the answer*

Enabling mobile workers to retrieve and upload data to corporate computers anywhere, anytime.

Now that's freedom!

LINK mobile devices to corporate computers

TRANSFORM mobile devices into powerful workstations

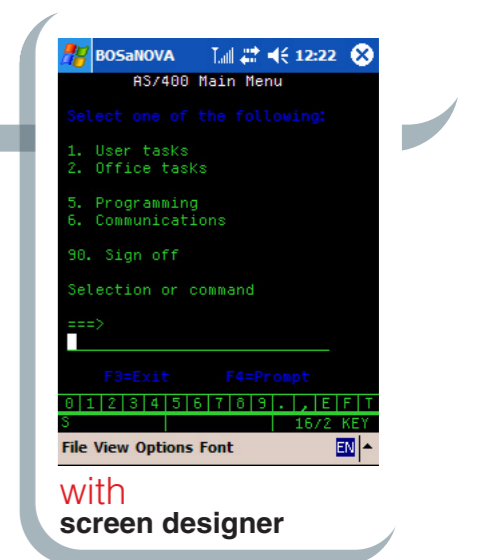

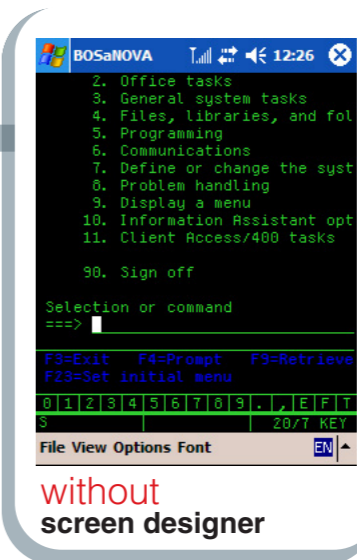

EXTEND legacy systems' life cycle by empowering them for the mobile world

ENSURE security through client-server architecture for authentication and authorization

KEEP-ALIVE interrupted sessions via the server, allowing users to reconnect to last screen

A SCREEN DESIGNER that makes a big difference

Screen Designer enables easy design of iSeries screens for mobile devices with no need for changes in the corporate application.

The best of two worlds

BOSâNOVA Mobile combines the convenience of mobile devices with the stability and power of the BOSâNOVA family for corporate computers.

Compatible with your world

BOSâNOVA Mobile is compatible with different mobile device processors and operating systems.

Control in every situation

Thanks to the server, corporate control over access and usage is ensured.
